# Why choose shutters?

Dimensions shutters are handcrafted to order from the finest materials and made-to-measure for a precise fit. Equally suited to contemporary or traditional décor, shutters provide a light and airy environment alongside privacy and security – features which will add value to your home and elegance to your room.

Shutters are practical too – they're extremely durable while easy to maintain. They allow you to control the amount of light coming into your room and will also help block out external street noise. They're ideal for sash and bay windows, french doors and many awkward shaped windows.

For the ultimate in timeless elegance look no further than the Dimensions shutters range

# Quality comes first

All of our shutters are made from varieties of high quality wood and can be fitted with a range of frames and fixings. There's a choice of four louver widths - 47mm, 64mm, 89mm and 114mm - to create an individual look for your window.

## Cedar

Made from the highest quality Western Red Cedar, our premium range is available in two beautiful oiled finishes, which display the natural variations in the wood. Our Cedar shutters range offers the ultimate in elegance and style.

## Groewood

Made from Basswood, a durable wood that gives an exceptionally smooth finish and shows the grain when stained. Our Groewood range with its wide choice of shades will provide an excellent choice for any window.

## Phoenix

Phoenix shutters are made from a lightweight hardwood and have an attractive grain that shows through, even when painted. There's a wide choice of stained and painted shades available in this range, as well as an attractive collection of neutrals.

## Marchwood

Marchwood shutters combine the lightweight, hardwood panels from our Phoenix range with a frame from our Classic collection. This produces an attractive grain finish at easy on the pocket prices. Available in three neutral painted shades.

## Classic

Classic shutters are made from low density fibreboard (LDF) and deliver affordable style. The Classic range includes three neutral painted shades.

# A choice of styles

## Full height

For a simple yet stunning effect choose a full shutter which covers the entire window.

## Tier-on-tier

Using two sets of shutters at your window – one to cover the bottom half and the other to cover the top half – allows even greater light control and privacy. Each set opens independently of the other for the greatest flexibility.

### Café style

This style of shutter adds a continental feel to your home. It is fitted to the bottom half of the window, allowing the light in, while providing privacy at the same time.

### Looking for dim-out?

#### Solid shutters

An alternative to standard shutters – this option provides near blackout and enhanced insulation from external noise. For optimum coverage of half glazed doors choose a solid shutter base and a louvred shutter top.

# Perfect for unusual windows

Because all of our shutters are handmade to your individual specifications they are ideal for unusual or awkward window shapes and can turn them into a truly stunning feature.

Whether the window shape is slanted, arched, hexagonal or round we can craft your shutter to fit perfectly.
